ENVIRONMENTALLY FRIENDLY!

We are constantly looking at reducing our carbon footprint. After months of research, we have now found an alternative to the white window bags which we use for the split items... Those brown bags are fully biodegradable. They are on order and you should soon see them being used to pack your orders.

We are also encouraging the reduction of cardboard boxes by using recycled crates. Please contact us if you have not already done so, and we will organise delivery in those crates rather than the branded Smith & Brock carbon boxes.
